EDUCATION

UNSW Sydney

NSW

Bachelor of Computer Science

Sept. 2022 - Dec. 2025

- Relevant Courses: Programming Fundamentals, Database Systems, Software Construction, Information Retrieval & Web Search, Big Data Management

EXPERIENCE

Operations Data Analyst

Mar. 2026 - Present

The Data Analytics Institute

Sydney, NSW, Australia

- Analyzed social media performance across Meta, Instagram, and LinkedIn, tracking 15+ KPIs via Buffer and Excel, contributing to a 20% increase in engagement across channels.
- Built a student survey analytics pipeline in LearnWorlds and Looker across 500+ learners, identifying a 12% drop-off point in course progression.
- Delivered finance and unit-economics reporting across 8 cohorts using Pipedrive and GCP data in Excel/Sheets and Looker, and automated workflows that cut manual reporting time by roughly 30%.

Data Analyst Intern

Dec. 2025 - Mar. 2026

Lagardere AWPL

Sydney, NSW, Australia

- Built end-to-end ETL pipelines in Microsoft Fabric across 5+ source systems, streamlining reporting for store performance, category sales, and inventory.
- Designed and deployed interactive Power BI dashboards tracking category-level sales, store metrics, and inventory levels, used by 15+ stakeholders across 4 regional teams.
- Automated weekly reporting workflows using Power Automate, cutting turnaround time by 40% and eliminating 6+ hours of manual work per week.

PROJECTS

Kmart Sales Performance Dashboard | *Excel, Pivot Tables, Dashboard Design*

- Cleaned and structured raw retail transaction data into an interactive Excel dashboard with KPI cards, slicers, and a geographic sales map.
- Surfaced key business insights, including a 79/21 store-vs-online sales split and top-performing states, suburbs, buyers, and managers.

Everyday Rewards Loyalty Dashboard | *Power BI, DAX, AI-Powered Analytics*

- Built a multi-page Power BI report analyzing loyalty activity across 10,000 customers and 100,000+ transactions, with drill-through pages.
- Applied Power BI's Key Influencers AI visual to identify the drivers of high vs. low points redemption across the program.

Blackmores HR Analytics Dashboard | *Tableau, Calculated Fields*

- Designed a Tableau dashboard analyzing attrition across 1,470 employees, using custom calculated fields for attrition rate, active headcount, and age binning.
- Identified key attrition drivers by department, education field, and age bracket to inform retention strategy.

Netflix Viewing Analytics | *Excel, Pearson Correlation, JavaScript*

- Built a correlation-based recommendation engine from subscriber viewing data across 2,000 subscribers and 9 titles, using Excel pivot tables and Pearson correlation analysis.
- Developed a self-contained web app ranking recommendations by match score, with a companion interactive correlation heatmap.

TECHNICAL SKILLS

Languages & Query: SQL, Python, DAX, Excel Formulas

BI & Visualization: Power BI, Tableau, Looker, Excel (Pivot Tables & Charts), Google Sheets

Data Engineering & Automation: Microsoft Fabric, Power Automate, Google Cloud Platform (GCP), Power Query, ETL Pipelines

Analytics Techniques: Correlation & Statistical Analysis, KPI Tracking & Reporting, Data Cleaning & Modelling, Dashboard Design

Tools & Platforms: Pipedrive, Buffer, LearnWorlds, Git/GitHub, Agile/Scrum

CERTIFICATIONS

Innovator Pro
